### **How does one present USA VALUES, Inc.** Who, what, where, when, why

**What** -- This is about servicing an ethical social network site designed to generate new money for early reading skills delivery. Your part of that service is advertising. You can innovate, every store front needs a web page with meta tags so it can be reach using as an example preschool 55118.

**Who** -- We must support ourselves with a network of effective citizens who will become prominent with a belief that everything would be better if 100% of age 3-6 children started kindergarten ready to read, count and understand positive direction.

**Where** --Your region is South East Metro, Northern Dakota County, and West St. Paul and South St. Paul.

**Why**---The education and economic growth of our community is the primary most important thing effective citizens can do for the future neighborhoods that we live in. The new deliveries that reach the most at-risk age 3-6 child require more rigor and commitment to be certain.

**When**--- The time is now. This effort will never become unimportant. The clarity is here. At-risk Mom's with their children will always need to know there is a very critical time sensitive gift they must deliver to their child if the child is going to have an even chance at prosperity via opportunity. Every effective citizen will always need to know it is an unconditional gift of time that has to be given if growth, opportunity, prosperity, safety and security are going to prevail for our kids. Once we start there will be no economic reason to stop. It will support itself.
